

Accounts Payable

SOLUTION FACTSHEET

SYSPRO Accounts Payable gives you control and management of your organization's expenditures. It improves cash flow, provides timely, accurate and efficient control of invoice processing, the payment of bills, the application of discounts and the total expense analyses that helps to maintain close relationships with suppliers. It turns the tedious and time-consuming process into a manageable piece of your corporate puzzle.

The Accounts Payable system provides an efficient method for recording purchases and supplier invoices as well as making expense distributions. It can be installed stand-alone or integrated with other modules in the SYSPRO system. Included are facilities for maintaining, verifying and reporting supplier account information. The module offers optional two-step invoice entry that allows users to enter, approve and then pay an invoice.

Extensive audit trails and journals form an integral part of the module. Against each supplier, invoice and transaction details are retained from which cash requirements, forecasting and purchase analysis may be printed. Suppliers can be held in local or foreign currency, paid in alternate currencies, and multi-branch accounting is available. In addition, free-format checks and remittances can be designed.

The Benefits of Accounts Payable

- Multi-branch and multi-currency
- Multi-period accounting for timely period-end rollovers
- Forecast of current and future cash requirements for improved cash flow
- Support for diverse tax systems, such as TAX/VAT/GST/Canadian HST, for global processing
- Invoice registration system for payment authorization control
- Secure authorization of registered supplier invoices
- Recurring invoice function for rapid processing of repeat charges
- Goods received note system for tracking accruals, matching invoices and controlling price variances
- Flexible payment methods, concurrent payment cycles, and automatic calculation of settlement discounts for efficient invoice settlement
- Electronic funds transfer (EFT), manual and automatic check processing, and bulk emailing of remittances for streamlined payment runs
- Void check processing for rapid reversal of payments processed in error or returned
- User-defined stationery formats for company-specific checks and remittances
- Full purchase order receipt and invoice history, as well as purchase analysis for supplier planning and general ledger transaction audit trail

Product Version:

SYSPRO 8

Related Modules:

- Accounts Receivable

Sectors:

Manufacturing and Distribution

Industries:

- Automotive Parts and Accessories
- Electronics
- Fabricated Metals
- Food and Beverage
- Industrial Machinery and Equipment
- Packaging
- Plastics and Rubber

- Full purchase order receipt and invoice history, as well as purchase analysis for supplier planning and general ledger transaction audit trail
- Seamlessly deal with foreign suppliers in terms of account settlement
- Reduce the risk of errors typically associated with manual currency translation calculations

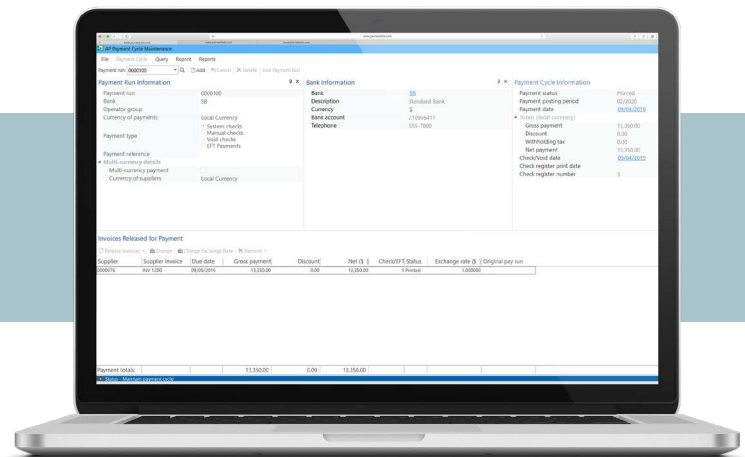

- Gain better control over exchange variances during your purchasing cycle
- Manage variances on supplier returns for greater financial control.

Accounts Payable Capabilities

- Choose from a variety of customer account numbering methods
- Process invoices and payments in multiple currencies
- Link suppliers to default expense ledger accounts
- Expense invoices over single or multiple general ledger accounts
- Post transactions to up to two prior periods
- Record invoices for approval prior to raising liability values
- Contra invoices between supplier and customer if the same organization
- Automate postings of recurring monthly entries, such as leases, rentals and maintenance contracts
- Automate balance functions and month end procedures
- Place an invoice on hold and restrict payment
- Select invoices for payment manually, or automatically based on chosen criteria
- Automatically void payments or reverse incorrect payment runs, security permitting
- Define company-suitable check, remittance and label formats using the stationery design tools
- Revalue foreign invoices in report-only or update mode
- Manage permanent and temporary suppliers
- Pay suppliers in any currency, including a currency that is different to that recorded against the supplier
- Manage adjustments associated with purchase price variances and exchange rates in the purchasing cycle
- Manage variances between the cost of an item and credit received for supplier returns by creating a Goods Received Note matched against the supplier credit note.

Audit Trails and Reporting

- Cash requirements reporting to improve cash management
- User-defined selection criteria for flexible reporting
- Free format check and remittance advice
- Manual checks
- Complete audit trails of invoices, payments and master file amendments
- Detailed screen query with history and graphics
- Maintains payment history as required
- Label print programs for mailings
- Grouping by supplier class, branch and bank
- Produce 1099 documents
