

riteSCAN 8 Mobile Warehouse for SYSPRO

SOLUTION FACTSHEET

riteSCAN, developed for SYSPRO by riteSOFT®, is a simple plug-and-play mobile warehouse management solution that is built specifically for SYSPRO users. It is your first step to warehouse automation and barcode scanning without the complexity and price tag of a full WMS solution. riteSCAN 8 has a web-based product design that gives users access to streamlined workflows and new functionality—plus seamless, real-time SYSPRO integration and reliability.

The Benefits of riteSCAN 8 Mobile Warehouse for SYSPRO:

Streamline receiving

- Receive and validate purchase order receipts by stock code, line item, or the entire PO via simple barcode scans. Inventory is updated seamlessly and in real-time within SYSPRO to provide front office with instant visibility. Labels can then be printed on the spot.

Speed & accuracy

- Smart functions, simple screens, and data validation help you count, scan, and move inventory accurately and easily. It also helps source items later when needed.

Prevent mispicks

- Pick orders your way while increasing front office visibility. Pick items for a single sales order or pick in batches for multiple orders – the choice is yours! Automatically validate on the spot that the correct stock codes, Lots, and quantities are picked. As orders are picked, the order status is immediately updated in SYSPRO to give your warehouse and front office up-to-the minute visibility.

Track Lots or serial numbers

- Get more efficient tracking with fast barcode scans. Automatically capture and validate stock codes, Lots, serials, and more as you receive, move inventory, issue raw materials, or pick sales orders. Then instantly post the data to SYSPRO as transactions occur.

Increase warehouse visibility

- Manage work more efficiently by utilizing customizable built-in dashboards. Immediately see what is happening in real-time within your warehouse. With the addition of transaction analytics, see how time is being spent such as the number of orders picked, purchase orders processed, and more.

Improved pallet management & tracking

- Rapidly group, manage, and move mixed inventory items or materials on a single pallet and transfer them to another warehouse or to your shop floor in a single scan with the riteSCAN Pallet Tracking add-on module.

Product Version:

SYSPRO Version

Sectors:

Manufacturing and Distribution

Industries:

- Automotive Parts and Accesories
- Electronics
- Fabricated Metals
- Food and Beverage
- Industrial Equipment and Machinery
- Packaging
- Plastics and Rubber

Technical Requirements:

- SYSPRO version 7.0 or 8.0
- Microsoft .NET Framework 4.8 and .NET Core 6.0 or higher
- 4 GHz or 2.2 GHz Multi Core (4 cores or more recommended)
- RAM: 12 GB recommended
- Operating System: Windows Server 2012 or higher
- Microsoft Azure SQL in the cloud; Microsoft SQL Server 2012 or higher on premise
- Microsoft Internet Information Services
- riteSCAN can run on any Windows, Android (5.1 and higher), or iOS device with a browser
- Browsers: Chrome (preferred), Firefox, MS Edge, or Safari

Time tracking

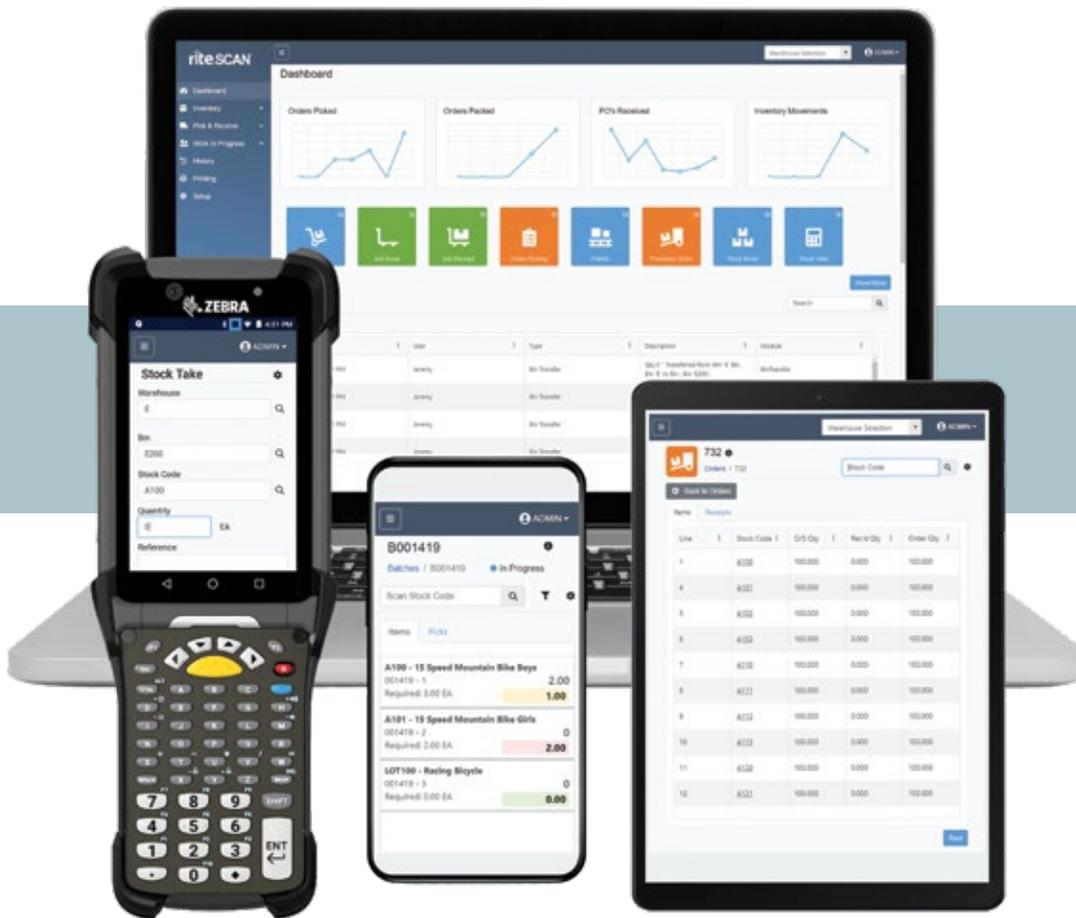

- Simply and easily gain more visibility and drive accountability with the new time tracking add-on module built for riteSCAN Mobile Warehouse for SYSPRO. See how time is being spent in the warehouse and on the shop floor and utilize the real-time data for business optimization. Track time against jobs, including labor and custom production data by job, task, and employee.

Task management (coming soon)

- With the task management functionality, supervisors can quickly and easily create jobs and tasks for team members, enabling team members to automatically see what to work on next. This allows complete transparency between supervisors and team members.

riteSCAN 8 Mobile Warehouse for SYSPRO Integration:

- riteSCAN seamlessly integrates to SYSPRO via a SYSPRO Runtime Product License
- Updates SYSPRO in real-time
- SYSPRO maintains an accurate system of record
- Facilitates on-going compatibility
